

## Construction Adhesives

### Mitre-Tite Contact Adhesive

Mitre-Tite two part contact adhesive kit comprises of a high viscosity instant adhesive and a cyanoacrylate activator. The simple application process (shown below) provides a quick method of bonding mitre joints in many different materials - in seconds.

EVA Hotmelt Cartridges

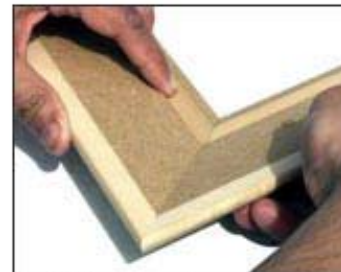

Mitre-Tite is perfect for MDF skirting and architecture joints, picture frames, cornice and profile mitres, PVCu trims, worktop end strips and much more...

Spray one surface with activator

Apply adhesive to other surface

Push both surfaces together and hold for 10 seconds

## Sprayable Contact Adhesive

NEY's Sprayable Contact Adhesive is a multipurpose product that will bond to a variety of substrates. As well as being water resistant it has excellent initial grab qualities and long open time. It is CFC free and has a very low odour.

**Will bond:**

- Wood
- Metal
- Rubber
- Fabric
- Most plastics
- Concrete
- Decorative laminate
- Carpets and more...

## Polyurethane Adhesive

With a 5 minute curing time this is a one component, solvent free, moisture curing adhesive specially formulated for water resistant bonding. It offers excellent adhesion to a variety of substrates.

**Will bond:**

- Wood
- Metal
- Laminates
- Polystyrene Foams
- Concrete
- Stone
- Brick
- Gypsum Boards and more...
