**Ideal for hi-gloss and standard 3D foils**

- Self cross linking
- High viscosity
- Quick drying time
- Indication colour
- Low re-activation temperature
- Ideal for hi-gloss and standard 3D foils
- Long shelf-life

## Spraysafe Advanced

3D Lamination Adhesive

To partner the continually increasing range of 3D lamination foils, we are pleased to offer a specially developed adhesive, specifically designed for 3D lamination bonding. Spraysafe is a cross-linked, single component, polyurethane dispersion adhesive, giving solid adhesion between PVC and wood based substrates, via membrane pressing.

It has excellent heat resistance and shows particularly high initial bond strength. These Spraysafe qualities outweigh those of many two part products, which incorporate an isocyanate hardener.

### Spraysafe advanced

Size	Part Number	Pack Qty
