

Aluminium Framed Door & Drawer Systems

Decofix

Aluminium door systems - ideal for home or office

Drop down doors

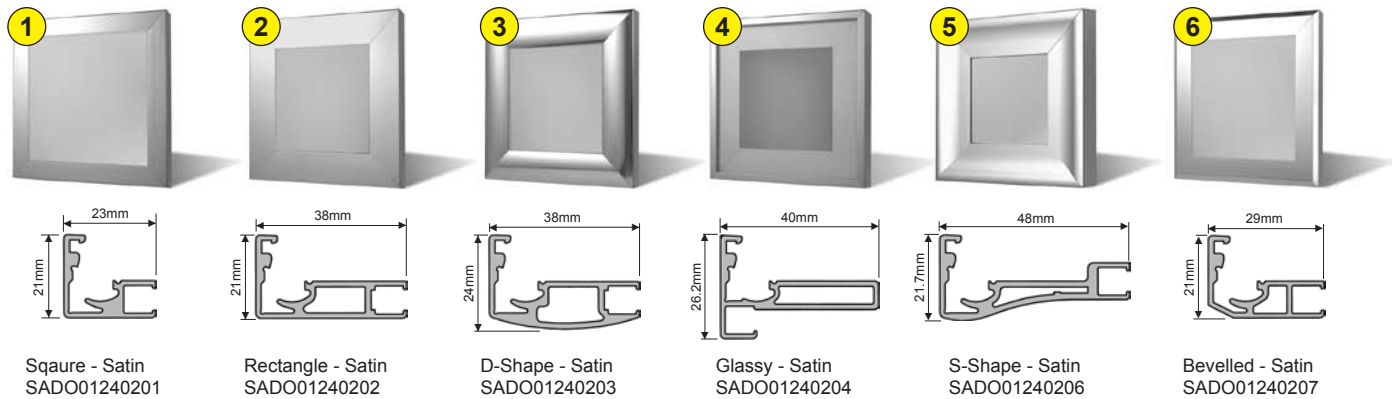

Drawer systems

Introduction

Decofix is synonymous for “*dynamism*” and “*trend*”, or shall we say “*dynamic trend*”? There is no such thing as an aluminium trend in itself, it’s widely used in many aspects of day to day life.

However, the aluminium image is rather being used to underline a certain style or to subtly accentuate products. The Decofix system is a great way to exploit this phenomenon.

Different profiles available

NEY can also provide the machinery for cutting and assembling these products

Aluminium profile saw

Includes: Infeed and outfeed roller support tables with millimetric scale and flip-over stops.

Clamping / assembly table

Includes: Table extension and clamps.
