

Panel Wipe

Plastic cleaner

1lt container

5lt container

Contact adhesive

Easily remove marker pen and other ink marks

Introduction to Panel Wipe

For effortless removal of adhesive residue, glue streaks, marker pen, pencil marks and other impurities on all kinds of plastic surfaces - e.g. ABS, PVC, Melamine, Polypropylene etc.

- Dries quickly without leaving streaks or film residue on surfaces.
- Possesses a pleasant citrus aroma due to a natural lemon extract.
- Does not contain chlorinated or fluorinated hydrocarbons.
- Less consumption compared to traditional cleansing thinner.

ABS

**THIS PRODUCT IS
SUITABLE
FOR USE WITH ABS**

Some traditional cleaners are not!

Plunger can

The perfect way to dispense Panel Wipe.

When handling flammable liquids used in cleaning applications, the plunger can is an easy one-handed operating dispenser. Its spring-loaded plunger, with a perforated metal flash arrester and dasher, protects against ignition and the escape of flammable vapours. Depressing the dasher delivers a measured amount of liquid to the cloth while the surplus drains back into the can.
