Cutting veneer

## Cutter

This multi-purpose cutter gives a precise and clean cut in plastic, rubber and wooden profiles. The high quality engineered composite steel blade combined with the anvil plate provides an effortless way of cutting profiles used in a multitude of professions.

- **Lever action**
- **Replaceable blade**
- **Soft grip**
- **Graduated markings**
- **Safety lock**

The blade is easily removed for sharpening or replacement. In addition, all cutter parts are individually available and can be easily replaced.
