

# Real Wood Veneers

0.5mm to 3mm

Thin veneer

Thick (Thru & Thru)

## Introduction to Real Wood Veneers

Due to modern manufacturing and jointing methods, real wood veneers are available in high quality continuous edgebanding rolls.

NEY supply a variety of species, thicknesses, widths, qualities and finishes.

## Standard Thin Veneer

Most commonly available in a single layer from 0.5mm - 0.9mm. Can be supplied sanded and fleeced or sanded and pre-glued. Other finishes are available to special order, such as un-sanded or lacquered (subject to minimum order quantities. Further details available on request).

0.5mm TO 0.9mm

### Swatch Available:

If you would like a swatch please do not hesitate to contact us. Alternatively visit our website and request one on-line.

## Thick Real Wood Veneer (Thru & Thru)

Thick wood lippings from the roll – this is possible thanks to modern veneering technology. Manufactured using multiple layers of real wood veneers throughout, with the top layer sanded to a high quality finish. This Thru & Thru quality veneer allows you to achieve a high quality finish when a rounded edge is required and also if a superior lacquered or stained finish is paramount.

0.9mm (single layer) TO 3mm
