

Sliding & Folding Door Systems

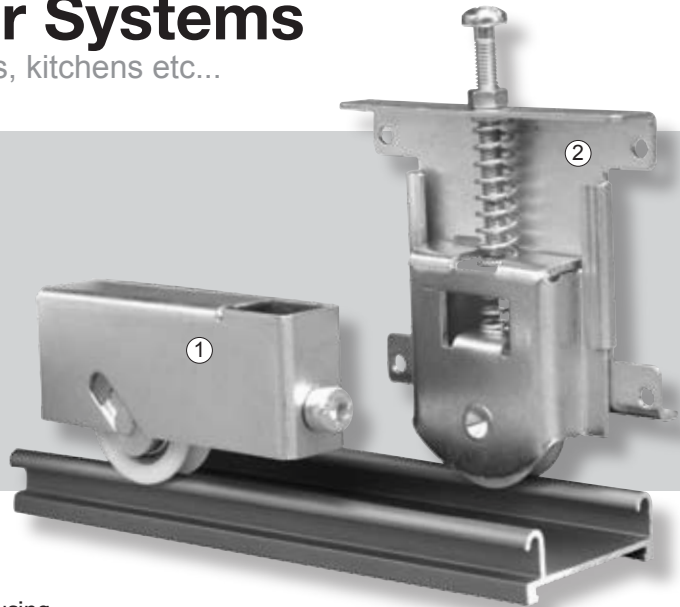

High quality solutions for shopfitting, bedrooms, kitchens etc...

Elegant profiles

Slide & fold system

① Concealed hardware ② Adjustable hardware

Aimed at small to large manufacturers that are already using sliding door systems or are intending to do so; NEY offer a range of products that have proven very successful since their launch in our first of the Materials catalogue. NEY are very pleased to be able to widen the range for this issue.

These decorative systems are interchangeable and offer a high degree of flexibility to the manufacturer not happy with all the complicated and expensive systems available, which also limit the designers imagination.

With LAGUNA you will be able to work on your existing ideas rather than being forced to adapt to a system you never wanted in the first instance. The vast range of aluminium profiles "opens doors" not only physically but mentally in terms of the freedom to do what YOU want to do and not what the products restrict you to.

...do what you want to do and not what the products restrict you to.
